

Labwork1:

Introduction to Statistics

Study the dataset in "SinhVienCaoDang.xlsx", then do the following:

- Describe number of variables, number of observations (sample size)
- Create two tables: one to describe quantitative variables and one to describe qualitative variables.
- For each variable:
 - Describe how to perform data coding
 - Indicate the type and range of its data

Note: The labwork will be required to submit to either google classroom or google drive folder to the course (will be informed later).
